***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Eitan et al. (5,886,561).

Fig. 1 discloses a comparator circuit 20, two supply voltages Vcc and Vstby, a select circuit 22/24/26 and a drive node VCC0 as recited in claim 12. The disclosure is directed toward power memory circuits. The memory circuits are seen as the recited drive circuits that operate between VCC0 and another predetermined potential (ground for example) and responds to an input as recited in claim 12.

Further shown are first 26 and second 24 transistors as recited in claim 15.

***Allowable Subject Matter***

3. Claims 1-11 appear to be allowable over the Prior Art of record. The Prior Art of record does not appear to disclose the latch elements recited in claims 1 and 8. Claims 13, 14 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
